

David Kaiser, PMP, MCITP, MCTS

David Kaiser, co-founder and managing partner of Schedule Associates International, has been working on and managing projects for over twenty years. For the last twelve years he has been spreading the word about the power of well-executed project management as an instructor, consultant and curriculum developer so that organizations can improve their ability to produce quality deliverables on time and on budget.

Mr. Kaiser holds a degree in Physics and an MBA with a concentration in finance, is a certified Project Management Professional, or PMP[®], and has attained Microsoft Certified Information Technology Professional (MCITP) certification on Microsoft Office Project Server 2007 and Microsoft Certified Technology Specialist (MCTS) on Microsoft Project 2010. He regularly attends Microsoft's Project Technical Briefings and conferences in order to remain current on the latest Microsoft Project offerings.

Mr. Kaiser has held positions in marketing, quality assurance, business planning and project management during his career at Xerox Corporation and the Eastman Kodak Company. His experience ranges from managing software, electrical and mechanical development to conducting focus groups in order to define customer needs and new product requirements. While at Kodak he was responsible for the development of image-intensive document management systems. At the time of his departure from Kodak he was Project Manager responsible for the development of Kodak's writeable DVD media.

David served as the Co-Director of the College of Scheduling's Industry Focus subcommittee and as such was actively engaged in the effort to establish the first definitive standard for schedule development, management, and analysis. He has also served as Vice President of Professional Development for the Rochester, New York Chapter of the Project Management Institute.

He remains an active user of Microsoft Project and recently concluded the Microsoft Project work to plan and track progress on an \$11 million natural gas pipeline relocation project in Wyoming.

Mr. Kaiser has trained students in project management in eight countries on a variety of topics ranging from international project management to advanced topics in scheduling and cost management. His customers can be found in copper mining, healthcare, IT, oil refining, construction, product development, consumer product marketing, web development, video gaming, defense, and more.

When training, David brings his love of project management to the classroom where he blends humor, an open communications style and in-depth knowledge of the subject matter to give students the knowledge that they need to successfully accomplish project objectives in the workplace. By combining his varied background with his unique approach to training he is able to make complex concepts understandable, link the classroom to the demands of the real world, and inspire students to take what they learned and make a difference with their projects.
